

The Flooring Industry Training Association (FITA) is the official facilitator of accredited training for all flooring installers.

A desperate need for new and skilled artisans in the country led to the formation of the association. The Construction, Education and Training Authority (CETA) has formed a partnership with FITA and a pilot project to improve skills, create career paths and increase employment in the construction industry. FITA will maintain a register of installers and their qualifications nationally.

WHY REGISTER WITH FITA?

Flooring manufacturers signed a memorandum of understanding with FITA to support contractors who are registered with us. Manufacturers will also recommend these FITA registered contractors because it demonstrates a willingness to invest in improving the skills of your installers.

In partnership with CETA, FITA is working to create new training material. This will allow installers of all floor types to qualify for a recognised qualification and build a career path.

Until the updated material is available, installers of any flooring type can apply for an official title from FITA, who will endorse their current skills set.

DO YOU OWN A FLOORING INSTALLATION COMPANY?

We are offering a limited number of free Recognition of Prior Learning (RPL) assessments to the staff of companies registered with FITA.

Completion of the assessment provides installers with a government recognised qualification and recognition for their experience.

RPL assessments currently cover basic carpeting, vinyl and installation of tiles/ceramics. CETA has provided funding for this project.

FITA is hosting RPL assessment opportunities in major centres to facilitate accreditation. Interested installers can register by emailing register@fitasa.co.za

ARE YOU A FLOORING INSTALLER?

FITA is offering free registration for all flooring installers for a limited time.

You will receive a FITA membership card, which you will be able to show to customers so that they know you are registered. This gives them confidence in your skills level and gives you access to all the help you need in building a career in flooring.

FITA will share job opportunities and training dates for installers on our website and on our Facebook page.

TALK TO FITA

You can call us, SMS, WhatsApp, email or send a Facebook message but let's get talking about your registration with FITA and how to apply for a RPL assessment.
